

**AMENDMENTS TO THE SPECIFICATION:**

Please insert the following heading on page 1 above line 3 of the specification:

Field of Invention

Please insert the following heading on page 1 above line 5 of the specification:

Background

Please insert the following heading on page 2 above line 22 of the specification:

Summary of Invention

Please delete the paragraph on page 2, lines 27-28 of the specification as shown:

~~The object is met by a refrigerating appliance door with the features of claim 1 and a refrigerating appliance with the features of claim 7.~~

Please insert the following heading on page 4 above line 9 of the specification:

Brief Description of the Drawings

Please insert the following heading on page 4 above line 29 of the specification:

Detailed Description

Please amend the following paragraph on page 6, lines 6-14 of the specification as shown:

The intermediate space 19 of the door 12 is closed at the lower edge, which is not shown in FIG. 4, by a second closure element 29. Since the edges of the walls 14, 15 are flush at their lower edge, i.e. the second transverse edges 30, 31, of the door 12, this second closure element 29 has the shape of the closure element 6 of FIG. 1. In order to construct the refrigerating appliance shown in FIG. 4, merely three parts differing from the corresponding parts of the refrigerating appliance of FIG. 1 are needed: the control panel, the depth of which is partly reduced in the case of the refrigerating appliance according to

ATTORNEY DOCKET NO.: 2002P01555WOUS

the invention, the closure element 26 and the slightly prolonged outer wall 14 of the door.  
All other parts can be used identically for both types of refrigerating appliance.
